

ReePlace Fertilizer. ReeDuce Water. ReeStore Soil Health.

APPLICATION INSTRUCTIONS

ReeCourse Fairway Formula

- Initial Application (Annually). Apply two gallons per acre of ReeCourse Fairways Formula, or six ounces per 1000 square feet, for the initial application on the fairways (and rough if desired). This application should be made when first starting use of the product, or as close to spring green-up as possible for repeat users.
- Continuing Applications. Apply 1/2-gallon, or one and one-half ounces per 1000 square feet, per acre every month.

It is important that chemical fertilizers are reduced significantly when using ReeCourse Fairways Formula or ReeCourse Greens Formula.
