

*ReePlace Fertilizer. ReeDuce Water. ReeStore Soil Health.*

## **APPLICATION INSTRUCTIONS**

### ReeCourse Greens Formula

- Initial Application (Annually). Apply two gallons per acre of ReeCourse Greens Formula, or six ounces per 1000 square/feet, for the initial application on greens and tees. This application should be made when first starting use of the product, or as close to spring green-up as possible for repeat users.
- Continuing Applications. Apply one gallon, or three ounces per 1000 square feet, per acre every month on greens and tees. This can be split in two applications for even better results.

**It is important that chemical fertilizers are reduced significantly when using ReeCourse Fairways Formula or ReeCourse Greens Formula.**
